PREFACE

This Joint Mission Coverage Index (JMCI) furnishes a listing of intelligence targets covered by Mission G 3025. The listing provides the latest description based on photographic interpretation for each target covered by the mission. Items in the listing are arranged by (1) country, (2) WAC area within the country, and (3) coordinates reading from south to north and from west to east. An explanation of codes used in presenting the information is contained in the appendix.

For convenience of the user, a subject index to the intelligence targets has been included following the listing. Targets in the subject index are listed (1) by category, (2) alphabetically by country within the category, and (3) alphabetically by place name within the country.

Mission G 3025 was accomplished on 16 January 1961 and covered portions of China, North Vietnam, and South Vietnam (see accompanying Flight Line Trace). Major areas covered include: Hanoi, Nam Dinh, Haiphong, Thai Nguyen, Vinh, and Thanh Hoa, all in North Vietnam. Considerable military activity was noted at the above locations.

APPENDIX

EXPLANATION OF COLUMN HEADINGS AND PHOTO REFERENCES

Column headings used in the listing are as follows (reading from left to right):

City, Installation -- This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. The city and installation name is followed by a capsule description, where appropriate.

Coordinates -- Coordinates are given to the nearest minute. When the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC -- This column provides the World Aeronautical Chart number for the area in which the subject installation lies.

Installation Numbers -- The Installation Numbers column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second column lists the installation number assigned by PIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since installation numbers are repeated from WAC to WAC. For example, there is a PIC target numbered 0586-1 and a PIC target numbered 0585-1. In each instance, the PIC installation is 1, but the installations appear on different WACs.

Approved For Release 2000/06/01 : CIA-RDP89B00569R000100060016-1

TOP SECRET CHESS

PIC/JMCI-8/61

A photo reference is provided for every item in the JMCI, and appears as the last line of a given item. This line is best explained by using an example:

R/375, 380 -- L/376, 381 SC

R/375, 380 designates photographic frames from the right half of the split format which cover the target, while L/376, 381 designates frames from the left half of the split format which cover the target.

SC designates cloud conditions as they exist over the target. The code for cloud conditions is as follows:

C	Clear
SC	Scattered Clouds
HC	Heavy Clouds
O	Overcast
H	Haze (includes smoke, blowing snow and dust)
CS	Cloud Shadow (cloud shadows cast on ground reducing interpretability)
